DETAILED ACTION

Priority

1. The priority to U.S. Provisional Application Number 60/232060 has been perfected in view of the amendment to the first sentence of the specification filed 23 December 2003.

Claim Rejections - 35 USC § 112

The rejection of claim 2 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement in the Office action mailed 03 October 2003 is withdrawn in view of the applicants remarks filed 23 December 2003 in which support for the claim is located on page 12, lines 5-8 of the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Freire.

The claims are drawn to methods of displaying models of a molecule in which the residues of the molecule that are affected by binding of a ligand are highlighted, and computer programs that execute the method.

Freire shows in figure 3 the results of an analysis of binding of a monoclonal antibody to lysozyme in which the residues that are affected by the binding are highlighted. Freire discusses the program Core_Bind on page 10118 and throughout that performed the analysis that resulted in figure 3.

Art Unit: 1631

3. Applicant's arguments filed 23 December 2003 have been fully considered but they are not persuasive. The applicants state on pages 7-9 of their arguments that Freire shows exhaustive consideration of all conformations, while the instant specification shows that only a subset of possible conformations need be examined. However the claims read on examination of any number of conformations and therefore the claimed invention continues to be anticipated by Freire.

Allowable Subject Matter

4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
